

Keep York County Warm! Overview

Habitat for Humanity York County's weatherization program, Keep York County Warm! (KYCW!), has partnered with Efficiency Maine and local energy auditors to provide professional energy audits and air sealing at **no-cost** to qualified low-income homeowners in York County.

Qualified homeowners receive:

- 1.) A home energy audit- the energy audit will determine what weatherization services your home will most benefit from
- 2.) Professional Air Sealing
- 3.) At least one of the following: insulated box sills with spray foam, seal/insulate mobile home underbelly, repair, insulate and/or seal door or hatch, seal and/or insulate heat ducts or pipes, an additional 6 hours of air sealing
- 4.) Custom-fit interior storm window inserts
- 5.) Consideration for more extensive weatherization work such as basement or attic insulation

In return, we require that homeowners:

- 1.) Fill out a KYCW! application and **receive a referral** from a general assistance office or York County Community Action Corps or another approved organization
- 2.) Be available for one or two days of weatherization work

Habitat for Humanity DOES NOT:

- Provide heating assistance
- Replace appliances
- Replace windows, doors or siding
- Do any electrical or plumbing work
- Work on roofs

Homeowners who might benefit most from this program may:

- Have drafts and air leakage in their homes
- Have windows that are in poor condition
- Have the inability to perform work themselves due to illness, age, or lack of other resources

If you or approved applicants have more specific questions about our program, call our office at (207) 985-4850 or email KYCW@habitatyorkcounty.org.
